BizAI

AI-Powered Local Commerce Platform

Connecting neighbourhood shops with customers through intelligent insights, seamless ordering, and real-time analytics — powered by Groq AI.

 Two-Sided Marketplace

 Groq AI Integration

 Real-Time Analytics

 Mobile-First

 Cloud Deployed

⚠ THE PROBLEM

Local shops are **flying blind** in a digital world

Over 60 million kirana and local shops in India have no access to business intelligence, inventory management, or customer insights.

No Data Insights

Shop owners don't know which products sell best, peak hours, or revenue trends — all tracked in notebooks.

Manual Inventory

Stock tracking is done manually, leading to over-stocking, under-stocking, and missed sales opportunities.

No Customer Connection

Customers have no way to browse inventory, place orders, or track their orders from local shops online.

Zero AI Access

Enterprise AI tools are expensive and complex. Local shop owners have no access to actionable AI-driven advice.

✓ OUR SOLUTION

One platform. **Two sides.** Infinite value.

FOR SHOP OWNERS (SELLERS)

AI Business Dashboard

Real-time revenue, sales trends, and 7-day AI forecasts powered by Groq Llama 3.

AI Growth Advisor

Chat with an AI that knows your business data and gives personalised growth advice.

Inventory Management

Track stock levels, set low-stock alerts, and manage your product catalogue.

Order Management

Receive, confirm, and manage customer orders in real-time with status updates.

FOR CUSTOMERS (CONSUMERS)

Discover Local Shops

Browse all nearby shops by category — Kirana, Food, Electronics, and more.

Browse & Cart

View live inventory, search products, and add items to cart before visiting.

Place Pickup Orders

Place orders online and pay in cash when you arrive at the shop.

Track Order Status

Get real-time updates — Pending → Confirmed → Ready → Completed.

Groq AI makes every shop smarter & more profitable

Revenue Forecasting

AI analyses 7-day sales patterns with weekday/weekend variance to predict next week's revenue with confidence scores.

Business Insights

Groq Llama 3 generates 5 personalised insights from your actual sales data — top products, growth opportunities, slow movers.

Business Health Score

A 0–100 score (Thriving / Stable / Growing / Struggling) based on revenue growth, customer retention, and transaction volume.

AI Chat Advisor

Context-aware business chat — the AI knows your total revenue, recent sales, and customers to give tailored advice.

Growth Planning

AI-generated 30-60-90 day growth plan with specific, actionable steps based on your business stage and data.

Smart Fallback

Rule-based fallback system ensures insights always work — even if Groq API is unavailable, the shop owner gets useful data.

 Static Serving

Simple flow. Powerful results.

Seller Journey

- 1 Register as **Seller** with shop details
- 2 Add products to **Inventory** with prices & stock
- 3 Log sales, track **customers**, view dashboard
- 4 Get **AI insights**, forecasts & health score
- 5 Receive & manage **customer orders** live

Consumer Journey

- 1 Register as **Consumer** on the same app
- 2 Browse **local shops** filtered by category
- 3 View **live inventory**, add to cart
- 4 Place **pickup order** (no payment online)
- 5 Track **real-time status** → pick up & pay

100%

Mobile responsive

Built today. Scaling tomorrow.

BizAI is designed to bridge the gap between local shops and modern digital commerce — making AI accessible to every kirana store owner in India.

Phase 1 — Core Platform

Two-sided marketplace, seller dashboard, AI insights, order management, responsive UI.

Phase 2 — Hyperlocal Discovery

GPS-based shop discovery, delivery radius, real-time inventory sync across branches.

Phase 3 — Payments & Loyalty

UPI integration, digital receipts, customer loyalty points, and subscription plans for shops.
